## EARNIE INTRO IS AN IDEAL PAYROLL FOR SMALLER BUSINESSES

With over 20 years in payroll and thousands of companies using EARNIE software, Saswitch offers peace of mind for small companies looking for the right payroll solution. Legislation is becoming more complex and it is sometimes difficult for even the most experienced payroll professional to keep up-to-date.

When your business grows, we can grow with you.

You can upgrade seamlessly to one of our larger systems without losing any payroll data.

### PAYROLL FOR SMALL BUSINESSES

EARNIE intro is an ideal solution for smaller companies. It is a straightforward payroll system but still offers lots of useful features. As you would expect it fully handles Tax and NI but it can also do much more for you as well. Perfect as a first payroll or for any companies looking to increase functionality without spending a fortune.

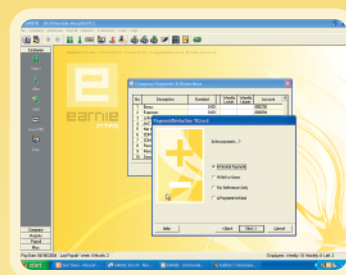

- Easily record and calculate sickness and maternity pay in a useful absence diary.
- Create reports to give you a clear picture of your payroll or simply select from a large pre-written collection.

### EASY TO USE

EARNIE is straightforward to install and comes with simple installation instructions and a helpful step-by-step wizard. We have even set up a template with the most common payments and deductions to help you get started.

Finding your way round the system is easy, even for novice users, but we also offer plenty of back-up support should you need it.

**And you can also benefit from Government incentives if you file your year-end by Internet saving you time and earning you money!**

*Items such as bonuses, pensions and loans can be set up to suit your requirements in a matter of minutes with an easy-to-use wizard.*

EARNIE Payroll has undergone the Inland Revenue Payroll Standard accreditation process. It has been awarded the Payroll Standard Accreditation logo, signifying that the product is up to date and covers all those areas considered essential for the accurate calculation of tax, National Insurance, tax credits and statutory payments.
